PAINTED, LAQUERED & STAINED

www.yorkshirepinefactory.co.uk

All our units are supplied in unpainted natural pine, tulipwood or oak. All units are sanded with a 120 grid sand paper. To improve the visual appearance of our units if pine is used all knots are cut out of the wood used for front frames.

Although we supply our kitchen units in natural wood we can paint, stain, lacquer our units in any Farrow and Ball or RAL colour.

We can quote to finish the exterior or we can quote to finish both the exterior and the interior. If you like the grain of the wood to remain visible after painting it will have to be handpainted, if you prefer a smooth finish it will have to be spray painted. Interior finishing will always be spray painted.

We can offer a matt, gloss, stain and clear lacquer finish but our standard paint or lacquer finish is a soft satin (20% sheen).

When you opt to have the units painted and in order to create a contrast you can mix and match between paint, clear lacquer or stains. Units and or doors can be painted in a combination of colours, for example painted exterior and clear lacquer interior, wall units in one colour and the base units in another colour.

When painting we apply a minimum of 2 base coats and 2 top coats. In order to have a good quality finish all units are sanded between coats. Unless knottless panels are used, a knott sealer will be used on all the knotts in the panels.
